

# Benefits

## The EZ STREET Advantage

EZ STREET is a polymer-modified cold asphalt guaranteed to permanently repair potholes, utility cuts, overlays, and edge repairs in asphalt or concrete. EZ STREET cold asphalt is currently being used across Canada. Not only does EZ STREET cold asphalt work in ALL weather conditions, it even works in water. EZ STREET cold asphalt is easy to apply and requires no mixing or tack coat.

No matter the location, the weather, or the time of day, EZ STREET cold asphalt is quick, effective, permanent, and requires a minimal installation crew. Simply sweep the area, fill the area with EZ STREET cold asphalt and compact with a shovel or car tire. It really is EZ!

### The Facts

- Guaranteed Permanent
- Works in Water
- Works in ALL Weather Conditions
- No mixing
- No tack coat required
- Ready to use
- Instantly ready for traffic
- Consumer lab-tested and approved
- Stockpiles for months

### Material Temperature and Compaction

EZ STREET cold asphalt can be applied when air temperatures are between -18°C and 38°C; however, EZ STREET cold asphalt will be most pliable, workable, and compactable at air temperatures ranging from 10°C to 32°C. In the winter months, warming of the EZ STREET material prior to application via a "hot box", heated dump bed, or patching truck is quite acceptable; although, it is imperative that the material temperature does not exceed 50°C.

To insure optimum performance EZ STREET cold asphalt should be applied and compacted in 2" maximum lifts. A vibratory steel wheel roller will always provide optimum results and performance; however, steel wheel or pneumatic rollers, compactor plates, wheel rolling, and hand tamping are also acceptable methods of compaction. Over compaction is rarely an issue.
